Are You a Parent?

If you're seeking a simple, effective, and free resource to teach fruits and vegetables to your kids in Spanish, sign up for a [free class](#) with [Homeschool Spanish Academy](#). Our Spanish teachers skillfully bring the material to life for little ones. It's fun, interactive, and a great way to make sure the information sticks. Try it out to see how live classes can help your family's Spanish pronunciation, conversational skills, and cultural knowledge!

Fun Learning Activities

Practice makes perfect, and practicing your new vocabulary words is the best way to commit them to memory. Check out these four activities to do on your own or in a group. The first two you can do on your own as an adult learner or as a parent teaching your kids, while the latter two are ideal for small groups.

Fruit Drawings

Write the names of 10-15 fruits on slips of paper. Pull one piece of paper from a bag and draw a picture of the fruit you selected. Draw and color both the outside and inside of the fruit (look it up on Google Images) and label it with the Spanish and English names. You can also label parts of the fruit including:

- *Las semillas* - seeds
- *El tallo* - stem
- *La flor* - flower
- *Las hojas* - leaves
- *Las raices* - roots

Taste Test

Use your five senses to learn about vegetables and fruits:

- Describe what the fruit looks like inside and out (*vista*)
- Smell it (*olfato*) and describe its aroma
- Touch the fruit or vegetable and describe the texture (*tacto*)
- Bite into it and describe what you hear (*oído*)
- Taste the fruit and learn words such as *dulce*, *amargo*, *acido*, and *salado* to describe it. (*gusto*).

Mercado Simulation

Pretend to buy and sell (real or plastic) fruit at a make-believe market. Participants can take turns playing the roles of seller and buyer. Use this sample dialogue to get started.

Person 1: *¿Qué fruta te gusta comer?*

Person 2: *Me gusta comer _____ . ¿Y tu, qué fruta te gusta?*

Person 1: *A mi me gusta _____ . ¿Cuanto cuesta _____ ? Quiero comprar _____ .*

This provides the opportunity to practice fruit and vegetable vocabulary. Extend the activity by asking questions and talking about colors, price, weight, and quantity.

Picnic Game

Gather in a circle and prompt each person to repeat the sentence: *Voy en un picnic y tengo que llevar _____*. Each child tries to think of a new fruit that hasn't been mentioned yet.

An alternative way to play it to have one participant come up with a secret rule, such as only sweet things. Students take turns raising their hands and asking *¿Puedo llevar _____?* The person who made the rule will reply *sí* or *no* accordingly. After all students have been invited to the picnic, prompt them to guess *la regla secreta*.
